"I see a **new Nigeria** emerging...one that will be built on the *labours of our heroes past*, hewn out of the debris of the present waste and engineered by the strength of the *future leaders: the youth*.

These young men and women will adopt **Information Technology** for the purpose of *personal development, nation building, regional cooperation and global participation*. They exist unknown today, but in the secrecy of their abode, they master the tool that will change their lives and that of their nation. This presentation is dedicated to such **heroes**; *unknown but silently building the nation's tomorrow today"*
